

# Integration Platform for Businesses

## Integration Challenges Slow Your Growth

SMBs run 25–50 SaaS apps.  
Enterprises run 400+.

30-40% of IT budgets are wasted  
on integration maintenance

Manual data entry costs \$28K  
per employee every year.

AI adoption stalls when systems don't  
connect, 75% of projects never launch.

## CloudQix is Your Solution

**Faster**

Launch integrations in  
hours or days, not months

**Scalable**

Supports startups through  
enterprises without added engineers

**Cost-Effective**

Accessibly priced, yet  
robust for enterprise scale

**AI-Ready**

Real-time structured data pipelines  
enable analytics and automation

## Launch **20X** Faster With CloudQix

CloudQix frees your team to focus on growth and innovation... not connections.

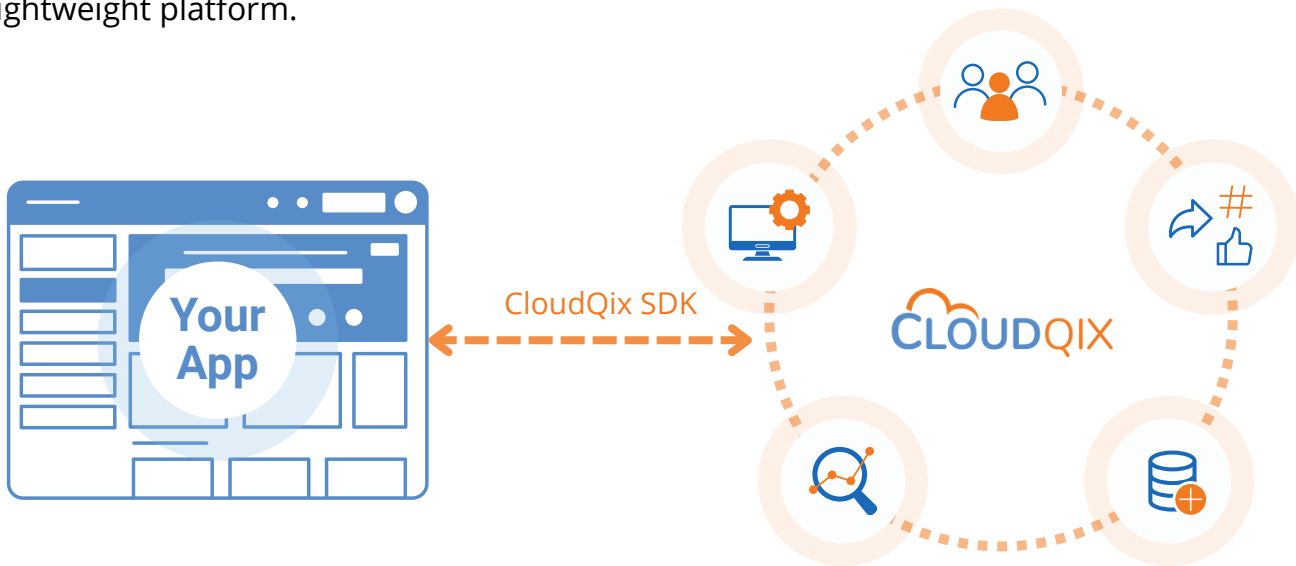

## How We Help

Cloudqix eliminates the hidden tax of integrations. Onboard faster, slash costs, free your engineers for high-value work, and unlock the full potential of AI.

Accelerating growth like never before.

# Faster Integrations for Software Companies

CloudQix is the next generation of iPaaS, designed to handle heavyweight use-cases in a lightweight platform.

## CloudQix Makes a Big Impact for Software Teams

### Close Deals Faster

Say "YES" to client integration needs and deliver quickly— without deploying code.

### Simplify Processes:

Manage integrations with a single connector to CloudQix, rather than dozens or hundreds of individual API connections

### Reduce Costs:

No need to over invest in API's, API Gateway, Monitoring, multiple authentication mechanisms. CloudQix handles it all.

### Stay Nimble:

Get the flexibility to easily extend your product compatibility to any system.

### Easy to Use:

Create quick, easy, secure connections.  
Simple SDK for your Development Environment.  
Supports Single or Multi-Tenant software.

# Meet The CloudQix Team

**David Potts**  
*Founder and CEO*

David Potts is the founder of CloudQix, a next-generation iPaaS that streamlines integrations and makes AI deployable in real operations. He previously led smartphone application development at Texas Instruments and served as Senior Vice President at SafeNet, directing teams that shipped enterprise security products. He also founded SalesWarp, an enterprise retail operations platform used at scale. David focuses on building durable companies and accountable teams that convert complex, multi-system environments into dependable workflows with measurable business outcomes. He holds a BSEE from Kansas State University and an MBA from The University of Texas at Austin.

**Michael White**  
*Chief of Staff*

Michael brings over 15 years of leadership experience in helping companies grow faster, operate more efficiently, and deliver tangible value. From scaling startups to streamlining public agencies, he has built a career centered on solving complex problems and achieving results. At CloudQix, he helps ensure the company not only builds the right technology but also brings it to market in a way that delivers ROI for customers.

**Carly Davison**  
*Marketing Director*

As one of CloudQix's early users, Carly experienced firsthand how the platform can transform business operations. She now channels that insight into shaping the product's interface and features, ensuring every detail delivers an intuitive, impactful user experience. Committed to driving innovation, Carly leads the planning of new connections, tools, and updates that keep CloudQix at the forefront as the most powerful iPaaS solution for growing teams and enterprises.

**Matt Lucido**  
*Senior Account Executive*

Matt specializes in helping clients in finance and cybersecurity solve high-stakes challenges and grow with confidence. At CloudQix, he focuses on delivering measurable results for customers by aligning technical solutions with business needs. Whether it's streamlining operations, reducing risk, or unlocking new opportunities, Matt helps organizations move faster with smarter integrations and a clear strategy for growth.

**Development Team**  
*Technical Development*

CloudQix is built by a team of experienced engineers who understand what it takes to deliver secure, scalable, and reliable integrations. With deep technical expertise across multiple disciplines, our development teams focus on building infrastructure you can trust. Every connector, workflow, and feature is designed to support real-world demands so your business can operate smoothly and scale without compromise.
